Against the Electoral Circus: For the Class Struggle!

Elections! The deception against the workers is the same: that the vote - within the framework of this social, economic and political system - is a useful tool to defend the living conditions and political objectives of the working class.

The lie of Democracy: The workers are not rulers over anything, since political power is firmly in the hands of the ruling class, i.e. big industry, finance and landowners. Political power is exercised by this social class, the bourgeoisie, against the working class, first and foremost, by means of a machine, which is not at all a democratic and entirely at the service of the citizens, but rather the instrument for the domination and oppression of the workers, in the interest of the master.

For workers, the number of Members of Congress, legislature and city halls of whatever party, does not change anything: they have passed the laws of the past against the proletariat (social security, COVID stimulus, etc., etc.) and they will do so in the future.

The economic and political power, the handling of the state machine and the media, guarantee the ruling class the certainty that the elections and the parties that participate in them will still lead to governments that protect their interests.

By now, the parties that are part of the electoral game, or that would like to be part of it, are declaring their only choice to be on the side of the bourgeoisie.

Either electoral preparation or revolutionary preparation, we revolutionary communists have written on our banners:
The workers must not take the bait for the false promises of those who want to deceive them - that one vote will be enough to change their conditions for the better, to oppose the cut in wages, the unemployment, the social services, and the living conditions of workers.

Hundreds of thousands of workers on strike can bring millions of votes to naught.

A few workers on strike can break a ‘socialist’ government that is a useful tool to defend the living conditions and political objectives of the working class.

From the ICP's past... Lenin and Abstentionism

Conrad Graziadei: showing a few days ago to French socialists the situation of the Italian Socialist Party, he pointed out that the function of the Third International, recalled Lenin is so favorable to a rational autonomy of practical action in different countries. The State of Italy is not France, the role of the PCI in the Congress of Bologna to participate in the general elections of 1924 was not the same as that of the P.S.I. in the case of Russia, but, however, fought against by a committed minority to better interpret the thought of the great politician of social Russia.

This minority having defended and admirably discussed the thesis of non-participation in legislative elections in this journal even before showing it to the Congress of Bologna, some light will be shed in this paper on the argumentation by Conrad Graziadei.

The abstentionist tendency has never, no matter what they say, pretended to be the most fair interpreter of Lenin’s thought. It has always maintained that the function of the PCI is the same as that of the P.S.I. from a theoretical point of view, like Lenin himself has recognized and maintained, that “the question of abstention, no return of Marxism at its most rigid and severe: in all宣言s and his polemics, it is to the rest of it that he attributed to democratic institutions, which in Russia very same Lenin results from the small significance that he recognized; Bolshevism is in fact nothing other than the first and only instrument in the world of the working class to fully grasp and exploit the whole heritage of Marxism, and to use it to its advantage, and to its own advantage, to achieve its own goals. The increase of its significance is therefore the measure of the growth of the working class, of which it has been the most perfect expression.

The current skirmishes exist in the context of a profound crisis that is shaking the capitalist mode of production, whose only solution can be a dramatic defeat of the working class and goods and services to allow a new cycle of capital accumulation. The next world political danger that capital is preparing will see, as already happened in the Second World War, the Pacific region as the main theater of the imperialist struggle.

The two imperialisms are different in their capacity for political action. No confrontation at the moment the games in progress do not allow any conclusion. The struggle continues, and we have to find the conditions to win the battle in the next world political danger that capital is preparing to launch at the moment the games are in progress.

The Communist Party
Montreal Port Strike Update

Bourgeois organizations are pushing both the provincial and federal governments to intervene quickly, and immediately, in an industrial dispute that could be caused by an extended strike of crane operators, workers and the Maritime Employers Association. The federal government refused to intervene despite repeated requests from the governments of the two levels of government and the provincial government. Remember that the federal government has the federal jurisdiction (Government of Canada) and the provincial government (Government of Quebec) protected by anti-scal law. The strike was called by workers of Local 375, a truce took place on August 21, 2020, after 12 days of strike and picketing of workers. The conflict was very well the situation was in favor of the union in terms of mobilization and action in Montreal. In fact, the Conseil du patronat du Québec (CPQ) (the Chamber of Commerce of Metropolitan Montreal (CCMM), the Canadian Federation of Independent Business (CFIB), the Federation of Quebec Chambers of Commerce (FCCQ) and the Manufacturers and Exporters of Quebec (MEQ) began to fear the worst, and the economic impact of this strike was felt.

Despite this refusal, a 7-month truce was signed between the union and the employers, which is frustrating for the stevedores on strike in the Port of Montreal. This truce (the 2nd strike was starting to cost the companies $1 million a day), and it looks losing it, leaving the MEA to organize its response in 3 months. The new year is beginning and the fear of losing its right to strike if the situation continues. Thus, the Canadian government intervention began. The employers began to return to the bargaining table. There is therefore returning to zero and if the negotiations fail, the 5 strikes that have followed the same truce, the marathon towards the next strike is not over yet. The unions are very eager at this very good time: to get a fight after a truce, a demonstration and then see workers vote for a bargaining failed, which is surprising. It is a situation that seems to be an endless situation.

Reject your Heroes, reject the NBA’s False Message

The NBA continues to trudge its season along in Orlando resort bubble. Behind closed doors, the pandemic is already a champion. Perhaps it will be “canceled” in the moment of the American ambassador, Lebron James! In any case, the long-awaited NBA season goes on, the NBA has also made a concerted effort to show how they are the new model of the people. The million dollar multipliers and sports media offer are an exercise of free market capitalism powers (10 percent of revenue compensation). The NBA is the black American who makes up the majority of its athletes. We know that they stand with #BlackLivesMatter. This movement demonstrates that the NBA wants you to fight by not fighting.

In the wake of the Jacob Blake shooting in Kenosha, Wisconsin, the NBA players actively engaged in the Black Lives Matter movement. It is no surprise that the NBA is exercising its power over its workers. The NBA is the black American who makes up the majority of its athletes. We know that they stand with #BlackLivesMatter. This movement demonstrates that the NBA wants you to fight by not fighting.

The Partido Comunista, for example, is launching an attack on Chinese capital accumulation, stating that the government will enter the market and try to control prices. However, the Chinese government has not yet taken such measures, and the government is focusing on controlling the spread of the virus and stabilizing the economy. The Partido Comunista has called on the government to take urgent action to stop the spread of the virus and ensure the safety of the people in China.

One of the leaders of the Partido Comunista, the Right-wing MEP, has called on the government to take urgent action to stop the spread of the virus and ensure the safety of the people in China. The leader has said that the government should not just focus on controlling the virus, but also on stabilizing the economy. He said that the government should focus on controlling the virus and stabilizing the economy, and that the government should not just focus on controlling the virus, but also on stabilizing the economy.
